

Open Data Kit

For **offline** usage on Android devices like cell phones or tablets we support the ODK Collect application. It uses OpenRosa underneath, so maybe other compliant applications will work as well but it was implemented to work with ODK Collect and at the moment of writing is tested up to version 1.44

... to be expanded ...

You can download ODK Collect from the Google Play Store or read more on Open Data Kit and designing surveys using the links below.
