

Here some examples of track definitions and how they work:

Duim kort (xpert Clinic) Small surgery and conservative treatment of the thumb:

Track fields use link to agenda (information imported from electronic health record)

The image shows a screenshot of the GemTracker application interface. The interface is organized into several sections:

- Top Section:** Contains a search bar, a list of filters (e.g., Gemstone, Weight, Price), and a table of search results.
- Table:** A large table with multiple columns, likely representing gemstone details such as Name, Weight, Price, and Location. The table is partially obscured by a vertical scrollbar on the left.
- Bottom Section:** A detailed view of a selected gemstone entry, showing its specific attributes and possibly a description or image.
